ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: EXPANDABLE CONTAINER

(57) Abstract: The present invention relates to an expandable container-like housing structure (1) that includes a main module provided with a door (7), and which further includes at least one expansion module (E₁) that includes a number of structural segments, such as a roof part (21) firmly connected to a first wall part (13), a floor part (11), and two second wall parts (33), wherein when the housing structure is expanded, the floor part (11) will swing out about a horizontal axle (12) at floor level, whereafter the first wall part (13) together with roof part (21) are intended to be projected out telescopically from the main module, wherein at least one second wall part (33) is mounted on a vertical axle (35) about which said second wall part (33) is adapted to swing out the roof part (21) and the first wall part (13) such as to form an additional wall to the expansion module (E₁).
